- English (Intermediate)
- Myanmar (Native)

SUMMARY

I have Mobile Developer experience with 5+ years and building high-performance apps using Flutter, Kotlin, and native Android. Specialized in real-time chat, live streaming, e-commerce features, and payment integrations. Strong in mobile architecture, debugging, and scalable development, with hands-on experience in DMS/WMS systems and hardware printing integrations.

WORK EXPERIENCE

Sr. Mobile Developer
MyDay Thu KywalCompany | Yangon

May 2025 - Present

- Developed and enhanced Social App and Messaging App features with high performance and stability.
- Implemented multi-wallet payment systems including MMQR, OK$, AYA Pay, KBZ Pay, and Wave Pay.
- Built and optimized real-time notification systems, including push notifications and chat alerts.
- Integrated Agora Live Streaming with host/viewer modes, chat modules, and live engagement features.
- Collaborated with product managers and backend teams to ship features rapidly and maintain app reliability.

Software Engineer
Global Technology Group | Yangon

Aug 2023 - April 2025

- Contributed to LSP and Payment Platform projects for enterprise clients.
- Integrated multiple payment gateways such as KBZ Pay, Wave Pay, A+ Pay, Citizen Pay, AYA Pay, OK$.
- Implemented Firebase, Dynamic Links, and data encryption to improve security and UX.
- Delivered high-quality mobile features with strong collaboration across cross-functional teams.
- Improved legacy mobile modules by optimizing performance, reducing crashes, and enhancing workflows.

Software Developer
ETAG RFID Company | Yangon

Feb 2023 - July 2023

- Developed mobile features for RFID Reader systems used in enterprise operations.
- Built architecture using Dependency Injection, Coroutines, and Navigation Graph.
- Implemented UI components with Jetpack Compose and managed local storage using Room.
- Worked closely with Singapore–Myanmar engineering teams to deliver stable, scalable mobile solutions.

WORK EXPERIENCE

Sr. Analyst Developer   **April 2022 - Jan 2023**
OnTheGo Software Company | Yangon

- Promoted to Senior Analyst Developer for strong technical performance and project ownership.
- Integrated ESC Printing, ZPL Printing, and Dot Matrix Printing with mobile applications for various hardware devices.
- Worked on major enterprise solutions including:
  - DVS (Delivery Van Sale)
  - DMS (Delivery Management System)
  - MWMS (Mobile Warehouse Management System)
  - PAD (Pick And Delivery) and related modules
- Developed features using MVVM, Coroutines, Room Database, Retrofit 2, Glide, Google Maps, Camera, Notifications, and Form IO.
- Worked with multiple API styles such as REST/JSON, SOAP API, and implemented Encryption/Decryption for secure data flow.

Jr. Analyst Developer   **Jan 2020 - March 2022**
OnTheGo Software | Yangon

- Developed small-to-medium mobile features independently across multiple projects.
- Quickly adapted to existing codebases and delivered reliable modules.
- Strengthened foundation in Android development, architecture, and backend communication.
